

**Table 4. Pulmonary Toxicity Associated with Antimetabolite Chemotherapeutic Agents**

Chemotherapeutic Agent	Clinical syndromes	Potential risk factors
Methotrexate	<ul style="list-style-type: none"> <li>Hypersensitivity pneumonitis</li> </ul>	<ul style="list-style-type: none"> <li>Older age</li> <li>Renal insufficiency</li> <li>Hypoalbuminemia</li> <li>Prior use of rheumatoid disease-modifying drugs</li> <li>Rheumatoid pleuropulmonary disease</li> <li>Diabetes</li> <li>Concomitant use of drugs that decrease renal excretion or protein binding</li> </ul>
	<ul style="list-style-type: none"> <li>Interstitial pneumonitis/ pulmonary fibrosis</li> </ul>	
	<ul style="list-style-type: none"> <li>Bronchiolitis obliterans organizing pneumonia</li> </ul>	
	<ul style="list-style-type: none"> <li>Acute respiratory distress syndrome</li> </ul>	<ul style="list-style-type: none"> <li>Intrathecal methotrexate</li> </ul>
Cytosine arabinoside	<ul style="list-style-type: none"> <li>Acute or subacute noncardiogenic pulmonary edema</li> </ul>	<ul style="list-style-type: none"> <li>Dose intensity</li> </ul>
	<ul style="list-style-type: none"> <li>Bronchiolitis obliterans organizing pneumonia</li> </ul>	<ul style="list-style-type: none"> <li>Concurrent treatment with anthracyclines or interferon-alpha</li> </ul>
Gemcitabine	<ul style="list-style-type: none"> <li>Interstitial pneumonitis/pulmonary fibrosis</li> <li>Noncardiogenic pulmonary edema</li> <li>Pleural effusion</li> </ul>	<ul style="list-style-type: none"> <li>Concurrent treatment with bleomycin, taxanes, vinorelbine</li> <li>Prior, current, or post-treatment therapeutic thoracic irradiation</li> </ul>
Fludarabine	<ul style="list-style-type: none"> <li>Interstitial pneumonitis</li> </ul>
